Bug Report – Website Review

Project: Sample Website Navigation & Content Review
Date: 2025-08-09
Tester: Kholoud Mohamed

---

1. Adobe Flash Player Unsupported

Description: Central content area depends on Adobe Flash Player, which is no longer supported in modern browsers, leaving the area blank.
Steps to Reproduce:

1. Open the homepage in any modern browser.

2. Observe the central content area.
   Actual Result: Central area is empty/unavailable.
   Expected Result: Content should be available using modern technologies (HTML5, JavaScript).
   Severity: High

---

2. Homepage Text is Verbose and Unclear

Description: Homepage text contains long and unclear sentences, impacting readability.
Steps to Reproduce:

1. Navigate to the homepage.

2. Read the text blocks.
   Actual Result: Text is lengthy and hard to quickly understand.
   Expected Result: Text should be concise and clear for better user engagement.
   Severity: Low

---

3. Search Box Missing Placeholder

Description: Search field does not guide the user on what to search for.
Steps to Reproduce:

1. Navigate to any page containing the search box.
   Actual Result: Search box is empty with no placeholder text.
   Expected Result: A placeholder such as "Search products…" should be shown.
   Severity: Medium

4. Search Box Placeholder Requires Manual Deletion

Description: The placeholder text behaves as prefilled text that must be manually deleted before typing.
Steps to Reproduce:

1. Click on the search field.
   Actual Result: User must delete placeholder text manually before entering a query.
   Expected Result: Placeholder should disappear automatically upon focus.
   Severity: Medium

5. Search Function Not Working

Description: Performing a search yields no action or results.
Steps to Reproduce:

1. Type any keyword in the search box.

2. Press Enter or click the Search button.
   Actual Result: Nothing happens; no results or feedback.
   Expected Result: Search results page should display matching products/content.
   Severity: High

6. Product Categories Font Inconsistency

Description: Font style and size in the Product Categories menu are inconsistent with main content.
Steps to Reproduce:

1. Navigate to the Products page.

2. Compare category menu font with main content font.
   Actual Result: Fonts are inconsistent.
   Expected Result: Fonts should match for visual consistency.
   Severity: Low

7. Active Page Highlight Missing

Description: Active navigation menu item is not clearly distinguished from inactive ones.
Steps to Reproduce:

1. Navigate through multiple pages using the main menu.
    Actual Result: Active page is not clearly highlighted.
    Expected Result: Active menu item should be visually distinct.
    Severity: Medium

---

8. Layout Not Responsive

Description: Website layout breaks on mobile devices (elements overlap or require horizontal scrolling).
Steps to Reproduce:

-   Open the website on a mobile device or small browser window.
    Actual Result: In some responsive breakpoints, the main image disappears. Page content becomes squashed at the top, leaving most of the page empty.
    Expected Result: Layout should adjust for different screen sizes.
    Severity: High

---

9. Poor Color Contrast

Description: White text on green background may not meet WCAG accessibility contrast guidelines.
Steps to Reproduce:

1. Review any section with green background and white text.
    Actual Result: Low contrast can make text harder to read.
    Expected Result: Colors should meet WCAG 2.1 contrast ratio requirements.
    Severity: Medium

---

10. Phone Number Not Clickable

Description: Phone number on the website cannot be tapped to initiate a call.
Steps to Reproduce:

1. View website on a mobile device.

2. Try tapping the phone number.
    Actual Result: No action occurs.

Expected Result: Phone number should be a clickable tel: link.
Severity: Low

---

11. Missing Favicon

Description: Website has no favicon, reducing brand identity.
Steps to Reproduce:

1. Open the website.

2. Check the browser tab.
   Actual Result: No favicon displayed.
   Expected Result: Favicon should be present.
   Severity: Low

---

12. No SSL Certificate

Description: Website loads over HTTP instead of HTTPS, creating a security risk.
Steps to Reproduce:

1. Open the website.

2. Check the address bar.
   Actual Result: HTTP protocol is used.
   Expected Result: Website should use HTTPS with a valid SSL certificate.
   Severity: High

---

13. Product Categories Always Show Same Content

Description: Clicking any category in the side menu shows the same content regardless of the category selected.
Steps to Reproduce:

1. Navigate to Products page.

2. Click multiple different categories in the side menu.
   Actual Result: Same content is displayed for all categories.
   Expected Result: Each category should display unique relevant content.
   Severity: High

---

14. Side Categories Load at Top of Products Tab

Description: Clicking a category in the side menu scrolls to the top of the Products tab instead of loading separate pages.
Steps to Reproduce:

1. Navigate to Products page.

2. Click a category in the side menu.
    Actual Result: Page scrolls to top but stays within same Products tab.
    Expected Result: Clicking a category should navigate to its dedicated page or section.
    Severity: Medium

---

15. "Company" Page 403 Error

Description: After selecting a category, clicking the "COMPANY" menu item results in a 403 Forbidden error.
Steps to Reproduce:

1. Navigate to Products page.

2. Click a category in the side menu.

3. Click the "COMPANY" menu item.
    Actual Result: 403 Forbidden error page is shown.
    Expected Result: "COMPANY" page should load normally.
    Severity: High
